Counseling, and Special Education
Counselor Education Program
2500 Walton Way
Augusta, GA 30904-2200

Parent Consent Form

The field experience component of the Master's Degree Program in Counselor Education at Augusta State University includes a practicum and internship experience. Internship is a period of supervised practice when counseling candidates observe and practice individual or group counseling and other counseling-related activities. Counseling services are conducted by counseling candidates from the Counselor Education Program who are under supervision from the professors in Counselor Education Program, as well as from certified or licensed counselors or other mental health practitioners at the school or community agency.

The counseling process is an involving experience. Professional counselors have found the use of audio and videotape an effective means of summary and reflection for client and counselor. The tapes are reviewed by the faculty supervisor once a week. All tapes are kept in strict confidence and are used only for training purposes. Tapes are erased after supervision has been provided.

I give permission for the following counseling candidate to tape sessions for training purposes:
