A Sampling of Internet Resources concerning the topic:

- Look at [The Internet Public](#) or the [Librarian's Index to the Internet](#) for an example of how web directories work. Librarians' Index to the Internet (LII - "Our motto: 'Information You Can Trust.'") offers a searchable, browsable collection of over 16,000 high-quality Websites. Every site entered in the LII database is reviewed at least twice--sometimes three or four times--before it goes "live."

Shakespeare sources are found in the section on Renaissance & 17th-Century Literature.
- [Literary Resources on the Web](#)
- [American and English Literature Internet Resources](#)
- [Great Writers](#)
- [Mr. William Shakespeare and the Internet](#) – a terrific resource for students, it includes biographical information, a timeline, and critical resources. Its introduction is particularly useful.

Locating the Articles

For articles without full text you will find just a reference to an article; then you will need to check [GIL](#) or the list of [E-Journals](#) to find out how to retrieve the article. Further information is available in the handout on [locating journal articles](#).

Note: In GIL, a current subscription is indicated by a hyphen at the end of the year or volume. Magazines and Journals to which the Library subscribes are located on the 2nd floor, shelved alphabetically by title.

Interlibrary Loan - For articles or books which are not in the Library's collections in either print or electronic form, you will need to request each item you need. If you only need to request a book, you may use GIL Express, from the [GIL Universal Catalog](#), to order it from another library in the University System of Georgia that has a copy of the book available. For books and articles not available through GIL Express, from the [Reese Library](#) Home Page, click on [ILLiad](#) to register for this service and fill out an Interlibrary Loan form for a book or an article not available in the Reese Library's collections.

Other Internet Sources:

[Use search engines for finding information on the Internet](#), e.g., <http://www.google.com>

Some search engines also provide directories as part of their services; take a look at [SKS WebSelect](#) and the [Librarian's Index to the Internet](#) for some examples of how subject directories to the web work.

Be sure to [evaluate all your sources](#) carefully, especially those you retrieve yourself by searching the web.

Document your work.

For additional information and guidance on good documentation practices, the following sites may be useful:

[Avoiding Plagiarism](#) - a series of pages from the Online Writing Lab at Purdue University. Defines what plagiarism is in the context of academic writing, and presents steps during the writing process to help steer clear of plagiarizing.

[Plagiarism handout](#) - from UNC-Chapel Hill. Written from a student's point of view, it discusses why you need to be aware of good citation practices, and why plagiarism is such a "big deal".

[UWC's Helpful Handouts](#) - from the University Writing Center at the University of Central Florida. Contains a lengthy list of links to documentation guides developed by professional organizations and other universities [note: link to guides is found by clicking the Writing Resources link on the left]. When using another institution's citation guides, be sure to double-check the edition of the documentation manual that the guide was based on. Don't use a guide for anything older than the edition of the manual that you're using in your course.

[Citation Guidelines for GALILEO Resources](#) - Guidelines for citing materials that you retrieve from any of the GALILEO databases. Examples are given for MLA, APA, and Turabian styles.
