

## Psychology Program Map Bachelor's Degree

The following is an example of how a student can complete a bachelor's degree in psychology in four years. Regular meetings with an academic advisor are necessary to determine the best course sequence for each individual student. **Please note that courses in the core, major, and most minors are also offered in the summer.** Taking summer courses will lighten a student's load during the fall and spring semesters. Students are advised to complete the required English and Math courses as soon as possible.
