8mm Video Cassette Recorders/Players for Students Video Camera Editing Systems

Justification:

We need to recommend the purchase of 3 Hifi 8mm video cassette recorder/players. With the recent addition of the Student Technology purchase of 8mm Hifi Video camcorders, we offer a smaller, more portable and better quality video camera outside of the VHS format. Unfortunately we do not offer conversion capabilities. While this new medium of video recording is handy, the ability to view the finished product on one's home television or classroom tv/vcr is limited to impossible. The only alteranative to this is that we offer are video cassette adapters that can play the 8mm format in a VHS housing or connect the camera directly up to the VCR. The solution is the Sony EVC25 Video Cassette Recorder.

Vendor: Good Vibes Total amount \$1,497.00 3 Video Cassette Recorders

Individual Price Each:\$499.00

Mobile Presentation Carts

Justification:

In a continued effort to provide instructional presentation equipment to the classroom we are requesting 3 additional multimedia carts. These carts are equipped with a Gateway Computer, Digital Projector, VCR, and Cart. This allows students with the ability to prepare a display presentations and to access the internet from the classroom. It continues to be extremely difficult to provide presentaiton equipment to all the classrooms requesting it on the hour with limited resources. Students are requesting a large amount of presentation equipment daily. This type of equipment is becoming the most popular requested equipment on campus. We are presently circulating 13 of these units on main campus and the PEAC to different classrooms throughout campus.

Equipment Requested:

Quantity	Equipment Requested	Cost Each	Cost for 3
3	E-3400 Gateway Computer	\$1,357.00	4071.00
3	Infocus LP930 Data Projection Unit	\$6,200.00	18,600.00

Gateway Mobile Wireless Lab Solution

Justification:

The acquisition of a Gateway Mobile Wireless Lab would be beneficial to the students served in the Media Center.

The students would be able to use the carrels in the Media Center or a vacant place elsewhere in the area. With the limited number of computers available this would provide students with an added resource to utilize, especially when it gets close to midterm and finals. Students would be check out a lap top in the Media Center and be able to utilize it for their presentations.

Equipment:

Gateway Solo 5300LS (16 Gateway Laptops with 14.1 XGA TFT PC Card Wireless)

1 Mobile Cart

Equipment Cost: \$29,226

UP Grade of Student Multimedia Stations

Justification:

Replacement computers are needed for the outdated computers in the Media Center. Our present systems still run Windows 95 and are only Pentium class machines yet current technology is at the Pentium 4 with Gigahertz speed. The Office 2000 software and scanning software frequently demonstrates in compatibles with out present hardware. The system lock up and crashes are frustrating to our students already being pressed by class deadlines and slow computers. The new scanning software and scanners are also having problems with the older operating systems. Replacement computers will resolve many of the hindrances of the slower technology.

Equipment:

Quote Number: Q7HXW0PVLAS92NMW00JP

Quote Good Through: 10/6/01

System Name: E-4600 XL
