

Daily Problem 19

Name: _____

Score: _____

1. Predict the products of the following reactions. Write balanced molecular, complete ionic, and net ionic equations where possible. If no reaction occurs, write NR. Put an X over the part you wish not to have graded (otherwise, I choose).

a. Solutions of ammonium chloride and lead(II) nitrate are mixed.

b. Nitrous acid is added to a solution of calcium hydroxide.

c. Chlorine vapor flows over a solid sample of antimony.
